
Ammendments to the Claims:

1. (currently amended) An appendage that is retrofittable to a prior art an office chair ~~for converting said office chair into a computer workplace;~~
~~said office chair being characterized by~~ comprising a seat supported by a central column, having a feet assembly attached thereto;
wherein said appendage comprises a chassis coupled to a seat connector and a monitor supporting structure;
said seat connector adapted to facilitating connection of said chassis to said central column of said office chair and said monitor support structure for supporting a computer monitor thereon.
2. (original) The appendage of claim 1 wherein said monitor support structure comprises a monitor support tray.
3. (original) The appendage of claim 1 wherein said chassis includes at least one elongated supporting rail having an arcuate form.
4. (original) The appendage of claim 1 further comprising a means for varying the position and angle of said monitor support structure with respect to said chair.
5. (currently amended) The appendage of claim 1 wherein said chassis comprises a pair of tubular guide rails separated from each other by a fixed distance along ~~their length~~ a length of the pair of tubular guide rails.
6. (currently amended) The appendage of claim 4 wherein said means for varying comprises an attachment for attaching said monitor support structure to said chassis, said attachment being attachable to said chassis in a range of positions along the length of said chassis, allowing variation in position of a computer monitor on said monitor support structure with respect to the eyes of a user seated on said chair..

7. (currently amended) The appendage of claim 4 wherein said means for varying comprises a compression drive for supporting and holding said monitor support structure.
8. (original) The appendage of claim 7 wherein said drive is situated between a bracket affixed to said chassis below said monitor support structure and the bottom surface of said monitor support structure.
9. (currently amended) The appendage of claim 4 wherein said means for varying comprises two pairs of auxiliary rollers affixed to said monitor support structure, enabling said monitor support structure to slide freely with respect to said chassis.
10. (currently amended) The appendage of claim 4 wherein said means for varying comprises said seat connector, being attachable to said chassis in a range of positions along length thereof.
11. (original) The appendage of claim 10 wherein said seat connector is adapted to allow variation in viewing of angle and distance of monitor on monitor support structure from the eyes of a user seated on said office chair.
12. (currently amended) The appendage of claim 4 wherein attached to said chassis there is provided at least one foot pedal for application of a force on said chassis for moving it ~~said chassis~~ said chassis from a first position to a second position with respect to said office chair.
13. (original) The appendage of claim 12 further comprising a helical spring configured as a contra to said force, for returning said chassis from said second position to said first position when said force is no longer applied to said at least one foot pedal.

Claims 14-15 (canceled).
